76137 Santiago de Querétaro, México

• Mechanical maintenance, repairs of pumps, turbines and speed reducers.

• Design: SolidWorks.
Programming: CAMWorks y BobCAD - CAM.

• Precision machining in horizontal and vertical CNC.

• Machining on conventional lathes, milling machine, flat grinding machine and boring machine.

• Laser cutting, steel and aluminum.

• Machining on conventional lathes, milling machine, flat grinding machine and boring machine.

• Erosion of thread CNC.

• Water Jet Cutting
Steel, Aluminum and Nylamid.

• CNC bending Manufacturing
metallic parts.

PRECISION MACHINING IN HORIZONTAL AND VERTICAL CNC.

Assemblies Fixtures Scantlings.

CONVENTIONAL MACHINING MAX. TURN DIAMETER 2.20 METERS MAX. TURN LENGTH X 7.5 METERS.

- Rollers.
- Shafts.
- Bushings.

• CNC VERTICAL Max Turn Diameter: 2000 mm Max
Turn Length: 1500 mm • CNC HORIZONTAL •
Capacity for 2000 mm length X 34.5 in.

SPECIALIZED METAL FABRICATIONS.

Tanks and hoppers.

Elbows and transitions of large dimensions
Pipeline.

Turbine and rotor containers.

Manufacture and assembly of metal
structures for industrial buildings.

Manufacture and repair of heat exchangers.

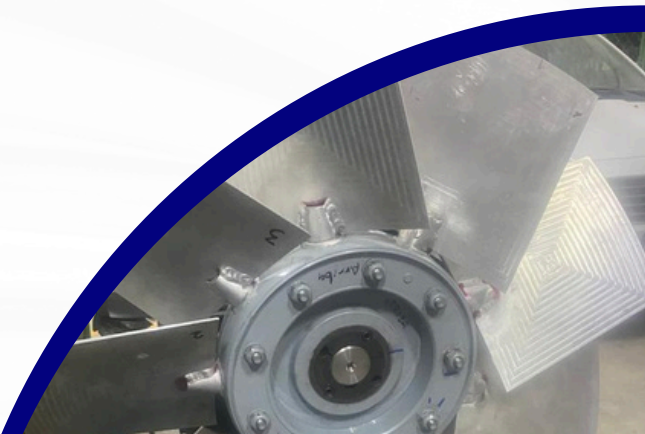

Manufacture of helicoidal conveyors.

MECHANICAL MAINTENANCE.

Vibration Analysis and Dynamic Balancing.

Vibration analysis to detect causes of
equipment failure, support in predictive and
preventive maintenance programs. We have
specialist techniques for support in
annualized maintenance with trend graphs
by team.

WE HAVE ROTARY BALANCING SERVICE ON SITE OR IN WORKSHOP

TURBOMACHINERY

On-site maintenance, repairs in our
facilities, technical assistance by specialized
personnel, repair and maintenance of:
Steam turbines Pumps in general Air and
gas compressors Electric generators
Gearboxes Fans Reducers and speed
increasers.

Steam turbines and pumps in general.

Worthington Oceleco Goulds Sulzer Peerles
Tisa Byron Jackson.
